Tehran, Iran

Skills

- HTML&CSS
- Javascript
- React.js
- Redux (Toolkit)
- Next.js
- REST api
- TypeScript
- React-query
- Tailwind CSS
- MaterialUI
- SASS
- Git/Github
- postgresSQL
- Docker
- Node.js(express)
- Websocket
- .Net
- Nest.js
- prisma

Projects

- barbershop [demo](#) (Nextjs (App Router), Expressjs,TypeScript , postgresSql , Tailwind)
- OnlineChat [demo](#) (Nextjs (App Router), Socket.IO,Expressjs,TypeScript , postgresSql)
- Sunglasses [demo](#) (Nextjs (App Router),Expressjs,Prisma,TypeScript , postgresSql)
- peyvand [demo](#) (React js, postgresSql , Tailwind , material UI,)
- hamshagerdi [demo](#) (React js, postgresSql , Tailwind , material UI,)
- ConstERP [demo](#)(Next js , Typescript , material UI , Formik , Reac Query)
- Fitness-App [demo](#) (Next Js, Axios , cookie , tailwind)
- Divar-project [Github](#) (React Js , swagger , Axios , cookie , react-query)

Technical Skills

- Problem Solving
- Team Work
- Remote work experience
- Learning new Technologies
- Clean and Standardized Coding
- Responsive Design for Desktop
- **AI-Assisted Development:**
Prompt Engineering, Context Engineering, AI-Assisted Coding, AI-Powered Development Workflows

Work Experience

Const ERP – Developer (1 year)

- Developed multiple ERP modules (inventory, invoicing, HR) using **Next.js + TypeScript**.
- Built dynamic **forms with Formik/Yup**, reducing validation bugs by ~25%.
- Created interactive **tables, charts, and calendar views** for financial reporting and scheduling.
- Used **React Query** to cache server state, improving dashboard load time by 40%.
- Styled consistently with **Tailwind CSS + MUI** across 5+ core modules.

IsIran Company – Developer (1 year)

- Delivered education and training projects, including student/teacher portals and course management dashboards.
- Designed reusable **form components, sortable tables, and progress charts** used by 3 internal teams.
- Integrated **PostgreSQL** for dynamic reporting and attendance tracking.
- Applied **React.js, Tailwind CSS, and Material UI** to ensure responsive, accessible interfaces.

Electronic Mobin – Developer (1 year)

- Implemented **WebSocket connections** for live data updates across modules – eliminated manual page refreshes.
- Managed complex API state with **RTK Query + React Hook Form**, reducing boilerplate by 50%.
- Containerized development environment using **Docker** and Linux; wrote **unit tests** for critical UI flows.
- Collaborated with .NET backend team on API contracts using **Postman/Firecamp**.
- Built forms, tables, charts, and calendar components for multiple internal tools.

Education

Master's degree in computer engineering Artificial intelligence
